

# MATERNUM

Make birth safer

*A digital partogram to  
make birth safer.*

**Why to start using a  
digital partogram?**

Customize the partogram to your needs

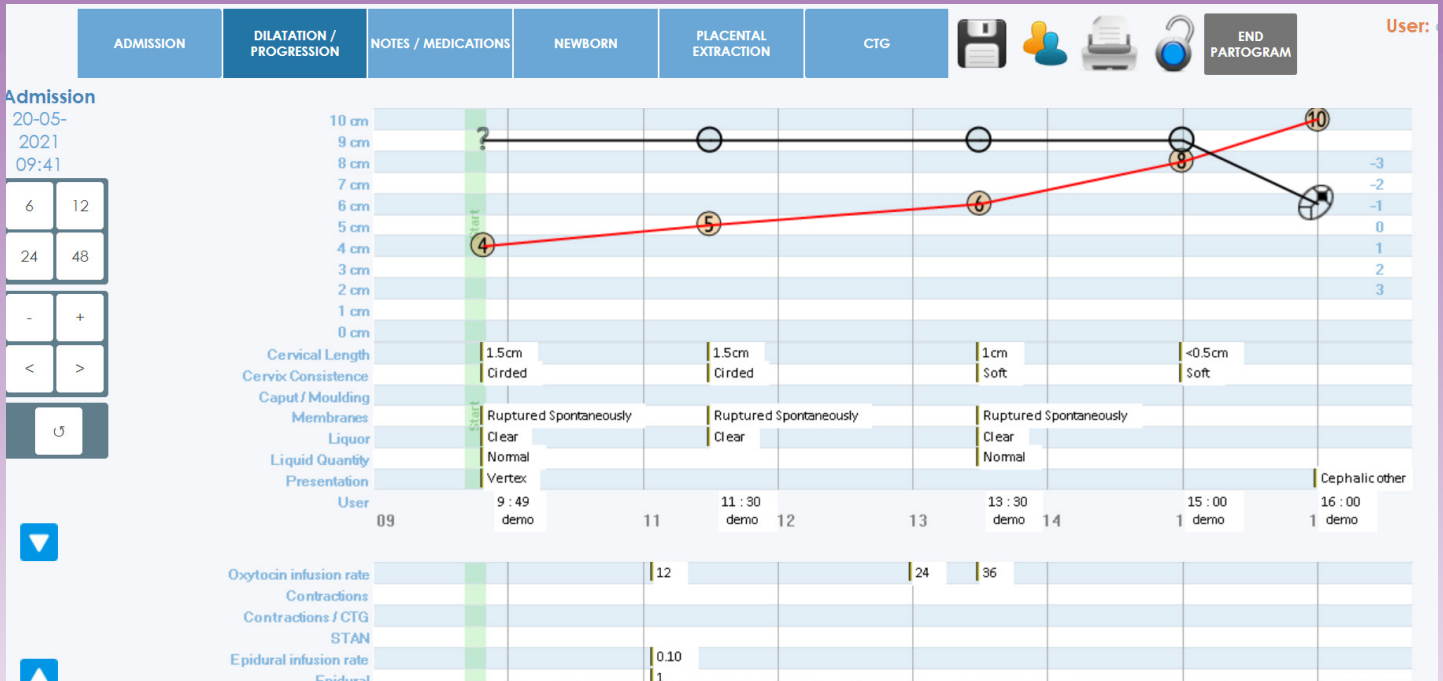

Do not introduce the same data twice

Use it from anywhere

# MATERNUM

Make birth safer

With **MATERNUM** you can customize the partogram according to your needs, making it possible to edit different modules and to add or erase fields.

With **MATERNUM** you can automatically fill in missing data, and send it to other services in the hospital, removing the need to fill in redundant data across different hospital systems.

With **MATERNUM** you can access patient information, including risk factors and progression notes from anywhere.

**Make birth safer**

- **Digital Wallboard** with full information of every patient in every room, in real time.
- A **100% paperless** solution that can be **integrated with a CTG monitoring central**. **Automatic data sharing** with other services and **fully customizable**.
- Introduction of notes about the parturient work, with **high usability and flexibility**.
- Access to patient information, including risk factors and progression notes in **different locations, devices, and platforms**.

**MATERNUM**  
Make birth safer

## MATERNUM patient list with indication of the Omniview Alerts

**MATERNUM** partogram and Omniview Sisporto monitoring CTG central are now deeply integrated. This comes with some important advantages as:

- Accessible anywhere, from any device: CTG Tracings become viewable via **MATERNUM**. Any computer, tablet or smartphone inside the hospital can be used to check both currently running tracings and the patient's

- Improved Patient Safety: Displaying real time Omniview Sisporto alerts in **MATERNUM** adds clinical information and facilitates.

## Embedded CTG in MATERNUM

- Convenience: Searching and comparing CTG tracings requires a lot less effort with **MATERNUM'S** Patient History, which displays the patient's full Antepartum CTG, Partogram and ongoing CTG in a chronological order.

- No Device Configuration Required: As **MATERNUM** is a Web Application, the only requirement for a device to access it is having an internet browser and being connected to the hospital's network. There is no need to install additional software on new PCs / Smartphones / Tablets that clinical staff use.
